COURT OF APPEALS

Division TWO

Deer C. (Division Two) D. No 42944-6-11

My 2012 JULY 20 PM 1:27 Shila J. Wyatt. Back in

NOV. STATE OF WASHINGTON got in a car accident involving  
a motorcycle. We both went to the hospital.

I was not drunk or on drugs, nor was I driving recklessly. When I went to court in Olympia, the lady Judge asked me what happened, so I told her everything, explaining the accident. I drew her a picture of the whole incident. She looked at my ticket front & back & saw that the officer wrote that there is no more investigation to go any further because it was clearly an accident. She found me "NOT GUILTY". She asked me about the car insurance, and I told her the owner of the car had insurance for anyone over 25 yrs. of age. She then told me to bring in proof of insurance, so I told her I would. However, when I tried to go get the proof of insurance from the owner of the car, I realized that it may be a little difficult because there is a no contact order between myself & the son of the person who owns the car. So, while I was in the process of trying to go about another way of getting that proof of insurance, I was in court in Grays Harbor County for a whole other matter, when I was told I had a

warrant out for my arrest for the car accident that I had already been found not guilty on. I knew nothing about this warrant. I did not know the warrant had anything to do with that same accident because it was already resolved, except for the fact that I was still waiting on getting the proof of insurance for the lady Judge. I feel I have been charged with the same accident again, that I was already found "not guilty" on. This was clearly an accident, so I am asking the court if I can please appeal this matter, and if your "Honorable Judge", will please open from this criminal charge.

Sincerely,  
Shih SWB

7-18-12

On November 29, 2011 I was sentenced to 61 months on this matter, after I was already found "not guilty".
